AICTE Activity Point Programme CERTIFICATE

This is to certify that the **AICTE Activity Point Programme** has been successfully carried out by **VIVEK H S** bearing **USN 1DT22IS181** bonafide student of **DAYANANDA SAGAR ACADEMY OF TECHNOLOGY AND MANAGEMENT** in partial fulfillment of the requirements for the award of degree of **Information Science and Engineering** of **Visvesvaraya Technological University, Belagavi** during **2022-2026**. It is certified that all corrections/suggestions indicated for Internal Assessment have been incorporated in the report. The AICTE Activity Point Programme report has been approved as it satisfies the academic requirements in respect of Programme for the said degree.

ACKNOWLEDGEMENT

The satisfaction and the euphoria that accompany the successful completion of any task would be incomplete without the mention of the people who made it possible. The constant guidance of these persons and encouragement provided, crowned our efforts with success and glory. Although it is not possible to thank all the members who helped for the completion of the AICTE Activity work individually, I take this opportunity to express my gratitude to one and all.

I am grateful to the management and our institute **DAYANANDA SAGAR ACADEMY OF TECHNOLOGY AND MANAGEMENT** with its very ideals and inspiration for having provided me with the facilities which made this work a success.

I express my sincere gratitude to **Dr. M Ravishankar, Principal, Dayananda Sagar Academy of Technology and Management** for the support and encouragement.

I wish to place on record, my grateful thanks to **Dr. Nandini Prasad K S, Dean-Foreign Affairs and HoD-ISE, Dayananda Sagar Academy of Technology and Management**, for the constant encouragement provided to me.

I am indebted with a deep sense of gratitude for the constant inspiration, encouragement, timely guidance and valid suggestion given to me by my guide **Mrs. Namitha K Y, Assistant Professor, Department of ISE, Dayananda Sagar Academy of Technology and Management.**

I am thankful to all the staff members of the department for providing relevant information and helped in different capacities in carrying out this AICTE activity work.

Last, but not least, I owe my debts to my parents, friends and also those who directly or indirectly have helped me to make the AICTE a success.

Sl. No.	Activity Heads	From Date -To Date	Number of Weeks	Total No. of Hours	Performance Appraisal / Points Earned (To be Filled by Coordinators)	Remarks
1	Facilitating 100% Digitized Money Transactions	27-02-2026 to 13-03-2026	2 Weeks	80-90		
2	Helping local schools to achieve good result & enhance their enrolment in Higher/ Technical/ Vocational Education	08-07-2024 to 21-07-2024	2 Weeks	80-90		
3	Developing Sustainable Water Management system	26-10-2024 to 09-11-2024	2 Weeks	80-90		
4	Developing and Managing Efficient Garbage Disposal System	12-05-2023 to 25-05-2023	2 Weeks	80-90		
5	Tourism Promotion Innovative Approaches	24-02-2024 to 09-03-2024	2 Weeks	80-90		
TOTAL ACTIVITY POINTS EARNED						

ABSTRACT

This set of activities focuses on community development through digital adoption, education support, environmental sustainability, waste management, and tourism promotion. The initiative on facilitating 100 percent digitized money transactions aims to create a cashless ecosystem using mobile applications, online banking, and QR-based systems. It improves transparency, security, and ease of financial transactions for the public.

Support was extended to local schools by conducting sessions and guidance programs to improve academic performance and motivate students to pursue higher, technical, and vocational education. These efforts help increase enrolment and awareness of career opportunities.

Environmental sustainability was addressed through the development of a sustainable water management system at Wadena Kere, including lake rejuvenation activities under Kere Habba. This work helps restore water resources and supports ecological balance.

Efficient garbage disposal practices were also promoted to improve cleanliness and waste management in the community. In addition, tourism promotion activities were carried out through visits to places like Shravanabelagola and Melkote, focusing on innovative approaches to increase awareness and attract visitors.

These combined efforts contribute to social, environmental, and economic development at the community level.

CHAPTER 1

INTRODUCTION

As part of the AICTE Activity Point Programme, a series of community-oriented activities were carried out with the objective of addressing key social, environmental, and educational challenges. These activities were designed to provide practical exposure while contributing to the development of society through awareness, participation, and sustainable practices. The initiatives focused on five major areas: digital financial inclusion, educational support, water resource management, waste management, and tourism promotion.

The activity on facilitating 100% digitized money transactions aimed to promote the adoption of digital payment systems among the public, especially small vendors and local businesses. By introducing tools such as UPI, mobile banking, and QR-based payments, the initiative worked towards creating a cashless, secure, and transparent financial environment.

The second activity focused on helping local schools improve academic performance and increase student enrolment in higher, technical, and vocational education. Through interactive sessions and guidance, students were encouraged to understand the importance of education and explore future career opportunities.

The development of a sustainable water management system emphasized the need to conserve and restore water resources. Activities such as lake rejuvenation and awareness programs highlighted the importance of maintaining ecological balance and ensuring long-term water availability.

The initiative on developing and managing an efficient garbage disposal system addressed the growing issue of waste management. By promoting waste segregation, recycling, and proper disposal practices, the activity contributed to creating a cleaner and healthier environment.

The tourism promotion activity focused on creating awareness about culturally and historically significant locations. By encouraging responsible tourism and highlighting local heritage, the initiative supported both cultural preservation and local economic development.

These activities collectively provided valuable real-world experience, strengthened community engagement, and contributed towards sustainable development. They also helped in developing essential skills such as teamwork, communication, and problem-solving, aligning with the broader goals of technical education and social responsibility.

CHAPTER 2

DETAILS OF ACTIVITIES

ACTIVITY 1: FACILITATING 100% DIGITIZED MONEY TRANSACTIONS

2.1.1 Introduction

As digital payment infrastructure becomes increasingly important in everyday commerce, many local markets and small businesses still depend heavily on cash due to limited technical awareness and security concerns. A large number of shopkeepers and street vendors are unfamiliar with bank-linked mobile payment systems, which restricts their participation in the growing digital economy.

To address this gap, I, Vivek H S, a Information Science and Engineering student, participated in the activity "Facilitating 100% Digitized Money Transactions." The objective was to assist merchants and vendors by explaining the functioning of UPI, QR-code payments, NPCI services, and digital transaction safety. The activity also focused on helping them set up and use applications such as BHIM, Google Pay, PhonePe, and Paytm so they could confidently accept cashless payments in their daily business operations.

2.1.2 Description

During the two-week activity, extensive on-ground engagement was carried out with small merchants, grocery stores, food vendors, pharmacies, and local businesses. Although many vendors owned smartphones, they had limited understanding of digital payment applications or hesitated to adopt them due to concerns about fraud and technical complexity.

The program combined conceptual explanations with hands-on assistance. Vendors were introduced to UPI, an instant real-time payment system developed by NPCI that enables direct bank-to-bank transfers through mobile devices. The concept of a UPI ID or Virtual Payment Address was explained, along with the authentication process using a UPI PIN and secure banking verification.

The BHIM (Bharat Interface for Money) application was used as the primary onboarding tool due to its simple interface and direct integration with the UPI system. Vendors were guided

step by step through downloading the application, verifying their mobile number, selecting their bank, linking their account, setting or resetting their UPI PIN, and generating a unique UPI ID.

QR codes were created and linked to their bank accounts, allowing customers to make payments through scanning. After gaining familiarity with BHIM, other applications such as Google Pay, PhonePe, and Paytm were introduced. Vendors were informed that all these platforms operate on the same UPI infrastructure, ensuring interoperability.

Merchants were trained to verify successful transactions using in-app confirmation messages, bank SMS alerts, and Unique Transaction Reference (UTR) numbers. They were advised not to rely on screenshots shown by customers. Additional guidance was provided on transaction limits, transaction history, refund procedures, and handling failed or pending payments.

Special emphasis was given to digital safety and fraud prevention. Vendors were instructed never to share OTPs or UPI PINs, to identify fraudulent collect requests, and to avoid responding to unknown calls posing as customer support. Information about grievance redressal mechanisms and the national cybercrime helpline was also provided.

The outreach covered both semi-urban and rural marketplaces. Real-time demonstrations helped vendors understand the complete transaction process. Continuous support and repeated guidance built confidence, especially among elderly shopkeepers. By the end of the activity, many vendors had successfully implemented QR-based payment systems and started accepting digital payments regularly.

2.1.3 Conclusion

The activity resulted in a clear increase in awareness and adoption of digital payment methods among local vendors and shopkeepers. Many merchants who previously relied only on cash began accepting UPI payments after learning to use applications such as BHIM, Google Pay, PhonePe, and Paytm.

They were able to generate QR codes, verify transactions using confirmation messages and UTR numbers, and handle issues such as failed or pending transactions. The training also addressed security concerns by explaining that the UPI PIN is required only for sending money and should never be shared, helping vendors recognize fraudulent activities.

ACTIVITY 2: HELPING LOCAL SCHOOLS TO ACHIEVE GOOD RESULT & ENHANCE THEIR ENROLMENT IN HIGHER/ TECHNICAL/ VOCATIONAL EDUCATION

2.2.1 Introduction

Education plays a key role in shaping the future of students and society. Many students in government and local schools face challenges such as lack of proper guidance, limited awareness about higher education, and low motivation to continue their studies. These issues often affect their academic performance and reduce their chances of enrolling in higher, technical, and vocational education.

To address this gap, I, Vivek H S, a student of Information Science and Engineering, participated in the activity "Helping Local Schools to Achieve Good Results and Enhance Enrolment in Higher, Technical, and Vocational Education." The main objective of this activity was to guide students, improve their understanding of subjects, and create awareness about future education opportunities.

2.2.2 Description

As part of this activity, visits were conducted to local government schools where structured and interactive sessions were organized for students. The sessions were planned to address both academic improvement and overall personal development. Students from different classes actively participated, and efforts were made to keep the sessions simple, practical, and easy to understand.

The activity began with an awareness session on the importance of education. Students were guided on how education plays a major role in shaping their future careers and improving their quality of life. Real-life examples were shared to show how individuals from similar backgrounds achieved success through education. Students were encouraged to set goals and develop a habit of consistent learning.

A separate session was conducted on basic computer awareness to introduce students to the digital world. Students were taught about the basic components of a computer, how to operate simple applications, and the importance of internet usage. Awareness about digital safety, such as protecting personal information and avoiding misuse of online platforms, was also

explained. This helped students understand the relevance of technology in education and future careers.

The activity also included sessions on good manners, discipline, and communication skills. Students were taught the importance of respect, polite behaviour, and maintaining proper conduct in school and public places. Role-based examples and small activities helped students understand how to behave in different situations and interact confidently with others.

Environmental awareness was another important part of the program. Students were educated about the importance of protecting nature, saving water, and maintaining cleanliness. Simple practices such as reducing plastic use, proper waste disposal, and keeping their surroundings clean were discussed. Students were encouraged to take small actions in their daily lives to contribute to environmental protection.

Interactive methods were used throughout the sessions to maintain student interest and participation. Question-answer sessions, group discussions, and small activities helped students engage actively rather than passively listening. Students were encouraged to share their thoughts, ask questions, and participate without hesitation.

Overall, the activity created a positive learning environment where students gained knowledge, improved confidence, and developed interest in continuing their education. The combination of academic guidance, practical knowledge, and motivational support made the sessions effective and meaningful.

2.2.3 Conclusion

The activity had a positive impact on students by improving their awareness and interest in education. Many students showed better understanding of the importance of studies and expressed interest in continuing their education beyond school level.

The sessions helped students gain basic knowledge, improve confidence, and develop a positive attitude towards learning. They also understood the importance of discipline, digital awareness, and environmental responsibility.

Overall, the activity contributed to improving academic motivation and encouraging students to pursue higher, technical, and vocational education. It also provided valuable experience in communication, teaching, and community interaction, highlighting the importance of education in social development.

ACTIVITY 3: DEVELOPING SUSTAINABLE WATER MANAGEMENT SYSTEM

2.3.1 Introduction

Water is a critical natural resource that supports life, agriculture, and ecological balance. Rapid urbanization, pollution, and poor management of water bodies have led to the degradation of lakes and reduced water availability. Many lakes in and around Bangalore have lost their capacity due to neglect, affecting groundwater levels and biodiversity.

To address this issue, I, Vivek H S, a student of Information Science and Engineering, participated in the activity "Developing Sustainable Water Management System." This activity was carried out as part of the Kere Habba event at Wadenkere Lake, which focused on restoring and conserving water resources through community participation and awareness. The objective was to understand the importance of lake ecosystems and promote sustainable water management practices.

2.3.2 Description

As part of this activity, active participation was made in the Kere Habba event conducted at Wadenkere Lake. The event focused on practical implementation of water conservation methods along with community awareness. The activity was structured to provide both theoretical understanding and hands-on experience in sustainable water management.

The program began with a guided nature walk around the lake. During this session, participants observed the natural ecosystem, including aquatic plants, surrounding vegetation, and bird species. Experts explained how lakes act as natural water storage systems and play a major role in groundwater recharge. The discussion also highlighted how pollution, urban waste, and encroachment affect the health of water bodies and reduce their storage capacity. This session helped in understanding the direct connection between human activities and environmental impact.

Following the nature walk, a large-scale lake cleaning drive was conducted. Participants were divided into groups and assigned different areas around the lake. Waste materials such as plastic covers, bottles, and other non-biodegradable items were collected. This activity provided practical exposure to the issue of water pollution and showed how improper waste disposal directly affects aquatic life and water quality. The collected waste was segregated into

biodegradable and non-biodegradable categories, promoting proper waste management practices.

A tree plantation drive was also organized as part of the activity. Saplings were planted around the lake to improve green cover and support long-term ecological balance. Participants were guided on how trees help in water conservation by improving soil structure, reducing surface runoff, and increasing water absorption into the ground. The importance of protecting these saplings and maintaining them regularly was also emphasized to ensure sustainable results.

Awareness sessions formed a key part of the activity. Experts and organizers explained various water conservation techniques such as rainwater harvesting, proper drainage management, and the need to avoid water wastage in daily life. Simple and practical solutions were discussed so that individuals could implement them easily at home and in their communities. The importance of maintaining cleanliness around water bodies and avoiding pollution was strongly emphasized.

Overall, the activity created awareness, improved environmental responsibility, and provided practical exposure to water management techniques. It highlighted that small actions such as cleaning, planting trees, and conserving water can lead to significant long-term benefits when performed consistently by the community.

2.3.3 Conclusion

The activity provided a clear understanding of the importance of sustainable water management and the role of lakes in maintaining ecological balance. Participation in Kere Habba helped in gaining practical experience in lake conservation and environmental protection.

The cleaning drive and plantation activities contributed to improving the condition of the lake, while awareness sessions helped in spreading knowledge about water conservation. Participants developed a sense of responsibility towards protecting natural resources.

Overall, the activity highlighted that community participation and awareness are essential for effective water management. It also provided valuable exposure to real-world environmental issues and strengthened commitment towards sustainable practices and conservation efforts.

ACTIVITY 4: DEVELOPING AND MANAGING EFFICIENT GARBAGE DISPOSAL SYSTEM

2.4.1 Introduction

In recent decades, rapid urbanization, industrial growth, and changing lifestyles have led to a significant increase in municipal solid waste across India. The absence of proper segregation practices, improper disposal methods, and lack of awareness have resulted in serious environmental issues such as land pollution, water contamination, air pollution from open burning, and increased health risks. Accumulated waste disturbs ecological balance and creates conditions for the spread of diseases.

Efficient garbage disposal is not only a civic responsibility but also essential for sustainable development. Recognizing this need, I, Vivek H S, a student of Information Science and Engineering, undertook the activity "Developing and Managing Efficient Garbage Disposal System and Water Treatment Plans" as part of the AICTE Activity Point Programme. The objective of this activity was to create awareness about waste segregation, proper disposal methods, recycling, and composting practices within the community.

The activity focused on practical implementation through awareness sessions, demonstrations, and direct interaction with people to encourage long-term behavioral change and environmental responsibility.

2.4.2 Description

The activity started with field observation of existing waste disposal practices in the community. It was observed that most households followed mixed waste disposal, where biodegradable waste, plastics, and recyclables were thrown together. This created difficulties in waste processing, increased landfill burden, and contributed to environmental pollution.

Based on these observations, awareness sessions were conducted to introduce the concept of waste segregation at source. Participants were educated about categorizing waste into biodegradable, non-biodegradable, recyclable, and hazardous waste. The importance of separating kitchen waste such as food leftovers and vegetable peels from plastic and packaging materials was clearly explained.

Practical demonstrations were conducted to show how waste can be managed effectively at the household level. Participants were guided to use separate bins for different types of waste, which helps in easy collection and processing. The concept of composting was explained in detail. The process of converting organic waste into compost through natural decomposition was demonstrated step by step. Participants learned how compost can be used as a natural fertilizer for plants, reducing dependency on chemical fertilizers.

The activity also promoted responsible consumption habits. Participants were encouraged to reduce waste generation by avoiding unnecessary packaging, reusing materials, and following sustainable lifestyle practices. Discussions highlighted how small changes in daily habits can significantly reduce environmental impact.

Continuous interaction with participants helped in building awareness and understanding of the complete waste management cycle. The activity covered all stages, including waste generation, segregation, collection, recycling, composting, and final disposal. Real-life examples and simple explanations made it easier for participants to understand and adopt these practices.

Overall, the activity was practical and community-focused, helping people understand their role in maintaining cleanliness and protecting the environment.

2.4.3 Conclusion

The activity “Developing and Managing Efficient Garbage Disposal System and Water Treatment Plans” played an important role in promoting environmental awareness and responsible waste management practices. Participants gained clear knowledge about waste segregation, recycling, and composting methods.

The activity highlighted that effective waste management depends on individual responsibility along with proper systems. Segregation at the source improves recycling efficiency, reduces landfill waste, and helps in controlling pollution.

Overall, the activity contributed to creating awareness, encouraging sustainable practices, and promoting a cleaner and healthier environment. It emphasized that continuous effort and community participation are essential for effective waste management and environmental protection.

ACTIVITY 5: TOURISM PROMOTION INNOVATIVE APPROACHES

2.5.1 Introduction

Tourism plays an important role in promoting cultural heritage, economic development, and social awareness. Many historical and religious places in Karnataka have great significance but often lack proper awareness and promotion. Promoting such places helps preserve cultural identity and supports local communities.

As part of this activity, I, Vivek H S, a student of Information Science and Engineering, participated in "Tourism Promotion – Innovative Approaches." The objective of this activity was to explore important heritage sites, understand their historical and cultural importance, and promote responsible tourism. The activity involved visits to Shravanabelagola and Melkote, which are well-known for their religious and historical significance.

2.5.2 Description

As part of this activity, an educational field visit was conducted to two important heritage destinations in Karnataka, Shravanabelagola and Melkote. The purpose of the visit was to understand the historical, cultural, and economic significance of these places and to explore ways to promote tourism through awareness and responsible practices.

The visit to Shravanabelagola focused on the Gomateshwara (Bahubali) statue, which is one of the tallest monolithic statues in the world. Participants climbed the hill to reach the statue, which provided practical exposure to the physical layout and accessibility of the site. During the visit, observations were made regarding the architectural design, stone carvings, inscriptions, and the historical background of the monument. Information about the religious importance of the site and events such as the Mahamastakabhisheka festival was also discussed.

Participants also observed the facilities provided for tourists, such as steps, railings, drinking water, and resting areas. The importance of maintaining these facilities for visitor safety and comfort was understood. Cleanliness around the area and proper waste disposal practices were also noted, highlighting the need for responsible visitor behavior.

The visit to Melkote provided insights into traditional temple architecture and cultural heritage. The main temple and surrounding structures reflected historical craftsmanship and religious

importance. Participants observed how rituals, traditions, and local customs are preserved and followed by the community. The environment around Melkote showed a blend of cultural heritage and natural beauty.

Interactions with local people and vendors helped in understanding how tourism supports local livelihoods. Small shops, food stalls, and local businesses depend on visitors for income. This highlighted the economic importance of tourism and the need to promote such places effectively.

Photography and documentation were also carried out during the visit. Participants captured images and collected information about the sites, which can be used for digital promotion and awareness campaigns. This approach helps in reaching a wider audience and promoting tourism in a modern way.

Awareness about responsible tourism was an important part of the activity. Participants were guided to respect cultural values, avoid damaging heritage structures, and maintain cleanliness. The importance of preserving historical sites for future generations was strongly emphasized.

The activity combined observation, learning, and practical understanding of tourism management. It showed how proper planning, maintenance, and promotion can improve tourist experience and contribute to sustainable development.

2.5.3 Conclusion

The tourism promotion activity provided valuable knowledge about the cultural and historical importance of Shravanabelagola and Melkote. It helped in understanding how tourism contributes to economic growth and cultural preservation.

The visits increased awareness about responsible tourism practices and the need to protect heritage sites. Participants developed a better understanding of how proper management and promotion can improve tourist experience.

Overall, the activity highlighted the importance of promoting tourism through innovative and sustainable approaches. It also provided practical exposure to real-world situations, improving observation skills and awareness about cultural heritage and community development.

CHAPTER 4

CONCLUSION

The AICTE Activity Point Programme provided practical exposure through a series of activities focused on digital awareness, education, environmental sustainability, and tourism. Each activity addressed real community needs and helped connect academic learning with real-world applications. The programme created opportunities to work directly with people, understand their challenges, and contribute through simple and effective solutions.

The digital transactions activity improved awareness among local vendors and helped them adopt UPI-based payment systems, increasing financial inclusion. The school outreach activity supported students by improving their understanding, motivation, and awareness of higher, technical, and vocational education. The water management activity at Wadenkere through Kere Habba highlighted the importance of lake conservation, community participation, and sustainable use of natural resources.

The garbage disposal activity created awareness about waste segregation, recycling, and responsible disposal practices, encouraging people to maintain cleanliness and reduce environmental pollution. The tourism promotion activity at Shravanabelagola and Melkote provided insights into cultural heritage, infrastructure, and the importance of responsible tourism, while also highlighting the role of digital platforms in promoting such places.

Overall, the programme helped in developing communication, teamwork, leadership, and problem-solving skills. It strengthened social responsibility and environmental awareness while providing meaningful learning beyond the classroom. The experience emphasized that consistent effort, awareness, and community participation are essential for sustainable development and positive societal impact.
